

I grew up in a strong Roman Catholic family and immigrated to Canada over 18 years ago. I have lived in the wonderful community of Milton for the past 11+ years with my wife and three children – my daughter and youngest son presently study in the HCDSB system while my oldest son has graduated and now studies at University of Waterloo.

Being active parishioners at Holy Rosary and St. Benedict, we are extremely fortunate to have had the opportunity to raise our children in a vibrant and diverse community such as Milton where our Catholic values are strongly intertwined within our schools. I have seen this first-hand having been a school council member for St. Benedict, Our Lady of Fatima, Queen of Heaven, Lumen Christi and Bishop Reding Catholic schools.

I hold a Bachelor of Engineering Degree in Electrical Engineering, which led me to work in global high tech firms for over 28 years. I also established and ran a business for over 10 years. Currently, I work as a Senior PCB Design Engineer for a global defense company in Burlington.

I sit on the Board of Directors for the Halton Catholic Children's Education Foundation, a role that I find very gratifying as it directly supports our students and families in need. I am also a member of the Holy Rosary Knights of Columbus Council.

Over the past decade, I have been greatly involved with many schools and youth programs in Milton and I am passionately committed to student success, supporting Catholic faith initiatives in the HCDSB system while being accountable to our families.

In my spare time, I volunteer and work with youth programs and am often seen helping out at the Parishes. I also like to travel and play badminton.

I look forward to serving the Milton community as one of your Catholic School Trustees for the next 4 years.
